PROGRAM

The program aims to develop the athletic and artistic skills of children 6-14 years old, who want to spend their time creatively after the school year has ended. The children are divided into groups according to their age and knowledge level. The program is primarily in Greek but the English language is also used by the instructors.

The menu is selected by the Camp's nutritionist and is designed to offer the nutritional needs to the children with special emphasis on the selection of healthy and vitamin-rich foods.

AFTERNOON ACTIVITIES (13:30-17:00)

The afternoon program strives to develop competence in educational programs such as the **English language** and **computers** (basic skills, MS office, robotics, web design) according to skill level, while cultivating the child's artistic and cultural skills through a variety of activities such as **storytelling, creative writing, comic art, magic art, theater/acting class, singing, and cooking**.
